**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Woods et al. (US 2003/0128324).

Woods discloses an optical holographic device for recording data bits in a holographic medium (124 of Fig. 1A), said device comprising a light modulator (116 of Fig. 1A) with addressable elements (See Fig. 5), each having an area and at least one optically active sub-area (150 in 3x3 array of Fig. 5) smaller than said area, means for directing a radiation beam towards said light modulator (117 of Fig. 1A) to form an encoded radiation beam so as to record at least first and second data bits (any two edge 150 elements space by an element in the 3x3 array) in said holographic medium, means (input signal to the SLM) for displacing said encoded radiation beam with respect to the holographic medium and means for controlling said displacing

means so as to record a third data bit (any middle 150 element in the 3x3 array between two edge elements) between said first and second data bits.

### ***Allowable Subject Matter***

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 3 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest the displacing means comprising an electrowetting based deflection device or a liquid crystal based deflection device as set forth in the claimed combination.
